

## A simple and flexible accounting solution

### Loyal to Avantage for 20 years

Lise Jetté has been a loyal customer for over 20 years. A user of the Avantage accounting solution since its very beginning, Ms Jetté has carried this software around with her to the various accounting positions she has held over the years in five different companies and as a freelance bookkeeper. Ms Jetté is now the General and Financial Manager of Groupe Châteaux Jouvence (Pavillon St-Louis), a development and management company for seniors' housing and health care facilities in the Joliette area.

### A tool to work efficiently

Managing a seniors' home of such scale (165 apartments) requires many employees and reliable working tools.

With Avantage Implication, project budget control is simplified and Ms Jetté can make informed decisions because she has accurate knowledge of her business' financial situation.

***"Avantage is easy to use and it's a logical software made to manage, and not only to count! I implemented Avantage when I started working at Groupe Châteaux Jouvence and now the entire accounting department uses it and wouldn't want to work without it."***

With her subscription to the All-Inclusive Support package, Ms Jetté can download updates online and call technical support any time at no extra cost.

**For Ms Lise Jetté, accounting is made simple!  
Thank you for having been a loyal customer for 20 years...**

### If like Groupe Châteaux Jouvence you wish to:

- ▶ Gain better control over project budgets and deadlines
- ▶ Make enlightened decisions in real time
- ▶ Simplify accounting management of your enterprise
- ▶ Integrate a real project management tool to your accounting system
