

**“With Le Gestionnaire, budget discrepancies can be noted in real time, helping us make the right decisions for both us and our customers.”**

Garoy Construction Inc. is a general contractor working primarily on commercial, institutional and industrial projects. The company increased its sales figures by imposing more rigid budgets and schedules. Mr. Stéphane Gilbert, the company controller, chose the management solutions to overcome a major source of irritation. ***“We had to manage company growth and concentrate on the analysis and financial control of projects, eliminate paperwork, and stop running around for information. This is what Avantage and Le Gestionnaire enabled us to do.”***

### **Accurate information and profit control in real time**

Avantage has been on the market for over 15 years meeting business accounting management needs. By integrating Le Gestionnaire, project managers can compile and view source information and share it with team members. The profitability of each project can be controlled in real time:

***“With Le Gestionnaire, budget discrepancies can be noted in real time, helping us make the right decisions for both us and our customers.”***

### **Standardizing and streamlining business processes**

In addition to the unique project management tools Le Gestionnaire offers, this integrated system supports and strengthens business processes. ***“No matter who does the work, Le Gestionnaire enables us to standardize our procedures and have better quality management reports. This contributes to strengthening our company’s brand name.”***

Avantage is the only solution on the market integrated to Le Gestionnaire. Data entry is eliminated, work hours and delays in accessing information are reduced. ***“With these management tools, we were able to manage substantial growth while considerably reducing data entry time. We can now channel our efforts on customer satisfaction.”***

### **Just like Garoy Construction Inc, if you want to:**

- ▶ Have better control over project schedules and budgets
- ▶ Make informed decisions in real time
- ▶ Computerize purchase orders and notices of change
- ▶ Integrate a comprehensive project management tool to your accounting system
